SUMMARY

Software Engineer with 4+ years building React and Angular applications backed by .NET, Java, and cloud APIs, with recent focus on AI-powered document processing using AWS Bedrock and Textract. Experienced leading UI modernization efforts, building reusable component libraries, and integrating third-party data platforms to automate real estate and lease management workflows.

WORK EXPERIENCE

CoStar Group (formerly Visual Lease)

Sept. 2023 – Present

Software Engineer III

Woodbridge, NJ

- Revamped Visual Lease app with React 18, incorporating Figma design mocks for a modern UI
- Developed an AI-powered parsing solution using AWS Textract and Bedrock to automatically extract key data fields such as tenant names, lease terms, rent amounts, property addresses, and renewal options from unstructured lease documents, including PDFs and scanned images
- Created a comprehensive component library from scratch, accelerating engineer development and ensuring full web accessibility.
- Engineered APIs integrating Arcadia Energy Data Platform and AWS, streamlining customer lease data into the system
- Streamlined end-to-end lease onboarding for real estate teams by reducing a multi-step manual abstraction process to near-zero touch, automatically processing hundreds of customer leases to date

CoStar Group (formerly Visual Lease)

Apr. 2022 – Sept. 2023

Software Engineer II

Woodbridge, NJ

- Enhanced the Visual Lease application by creating new feature pages using Angular and supporting them with .NET APIs
- Improved processing speed of financial reports by 80% through implementation of multi-threading techniques
- Guided junior team members on industry best practices, including key design patterns and coding standards, to elevate code quality and accelerate team development

Public Service Enterprise Group

Jan. 2021 – Mar. 2022

Senior Technology Professional

Newark, NJ

- Migrated Sitecore from version 8.2 to 10.1, transitioning infrastructure from IaaS to PaaS for improved scalability and cost efficiency
- Integrated build and release pipelines to automate .NET code deployment across Azure app services, streamlining development workflows
- Built and deployed APIs using AWS Lambda, enhancing backend services with efficient, event-driven architecture
- Created Selenium test cases to validate website stability prior to each release
- Developed Spring Boot applications for user lifecycle management, integrating Okta APIs and SAP connectivity
- Fixed 100 defects while adding user experience improvements

EDUCATION

Rutgers University

May 2019

Bachelor of Science in Computer Science, Minor in Mathematics

New Brunswick, NJ

SKILLS

- **Certifications:** Sitecore Experience Solution 9 Developer
- **Skills:** React, Angular, C#, .NET, Java, Spring, SQL
- **Cloud & AI:** AWS (Bedrock, Textract, Lambda), Azure, Okta, SAP
- **Tools & Practices:** Figma, Selenium, Git, Multi-threading, Web Accessibility
- **Interests:** Reading, Video Games, Volunteering, Playing Music
